These codes are for outpatient services only. Inpatient and observation services must be pre-authorized, except in-network routine vaginal and c-section deliveries.

These changes should be in place and operational as of 01/01/2024 to support Piedmont Community Health Plan. Please contact Customer Service for benefit specific information. An authorization is not a guarantee of payment.

The intent of this information is to assist processing with regard solely to authorization requirements. **Each claim will continue to be evaluated as required and standard practice considering, but not limited to, factors such as plan design, covered benefits, network restrictions, etc.**

Inpatient level of care require authorization, except for routine vaginal and c-section deliveries.
This includes skilled nursing facility, rehabilation facilities, behavioral health and LTACH level of care. Services where an in-network benefit level for an out of network provider or facility is expected require prior authorization. Some plans have limited or no out of network benefits. 3/13/24 removed authorization requirement for observation level of care retro back to 1/1/24.

Codes in yellow highlighting are changes from 2023 requirements. Notes have been added to termed codes and these codes shouldn't be billed after the termination date.

August 2024 Update-Sentry, TRBC and BMS members are no longer covered by PCHP. They have been removed from this update.
ASA Provider requirements for Centra Group Health Plan have been updated due to updates from Aetna ASA for ASA contracted providers.
Codes discontinued prior to 2024 have been removed. New codes effective 7/1/24 have been added.
